

Drop “C” tuning CAPO 1st FRET

C F C F C
Just like a little drop of water wets the branch to give it new leaves
F C

I'd would lend you a hand or give you my ear
G

Its better that we speak than you just grieve

C F C

We have the kind of love which seems to confront us

F C

To astound us and bring us to our knees

F But I'm the kind of friend **C** who'll be there in the end **F**
Am **G** **C**
Lookin' for a soft place to fall

C F C F C
Just like my old landline phone, dear the one you never ring at all
F C

I'll quietly await for you to sound my bell
G

Our silence broken by your timely call

C F C
You are the only one who seems to consume me
F C

To confuse me and make me feel so small

F C F
seems I'm the kind of friend who'll cry into the wind
Am G C
Lookin' for a soft place to fall

Just like a shadow in the late night so hard to see the next step to take

To choose to walk with me & feel you're never free

But baby, I would never let you crawl

**You're the only one who seems to soothe me
so stay with me & be there when I call**

If not you'll see me searchin', stumblin' on the ground

Lookin' for a soft place to fall

Lookin' for a soft place to fall
